

Collage Stad Eslöv - Re-Sourcing City in eastern Eslöv

Welcome to Bruksstaden! Here, the heritage of old industry and buildings meet stimulating habitats for people, plants and animals, along with new visions for what a neighborhood should be able to offer its citizens. All glued together into an urban collage. The collage stands for unexpected encounters, taking what you have, mixing styles and materials, old and new. A perfect idea for the needs and desires of Bruksstad. Our proposal presents new visions

for what a city should offer its citizens. A public workshop, open studios and a recycling square with a craft market will give Eslöv residents the space to engage in crafts and creativity in the public space.

Design Principles
Urban structure and qualities

Bruksstaden today
The site today and it's many different buildings

Buildings re-sourced
The proposal re-use as many buildings as possible. Only minor are removed but re-sourced as material for the rest of the area.

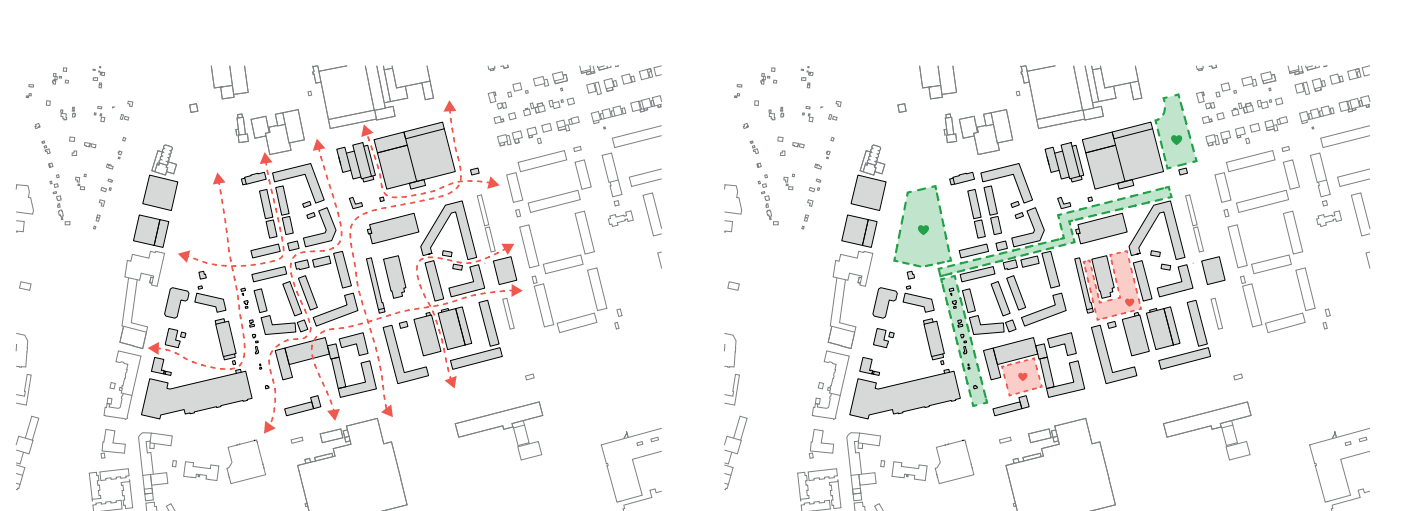

New added structures
New housing and other structures are added to make the area an attractive and vibrant neighbourhood.

Block structures and courtyards
The area is split into blocks with courtyards and adapted to the existing buildings.

Main passages through site
Two main passages take's you through the site. A bike path and a pedestrian path.

Pockets into the area
To connect the area to the rest of Eslöv small pockets on the perimeter invites into the area.

Porosity
The new Bruksstaden is more finely grained with many different paths through the area.

Squares, parks and a blue-green boulevard
Bruksstaden has attractive and public spaces that adds urban life and greenery to the area.
